

Junta acústica TRIDENT

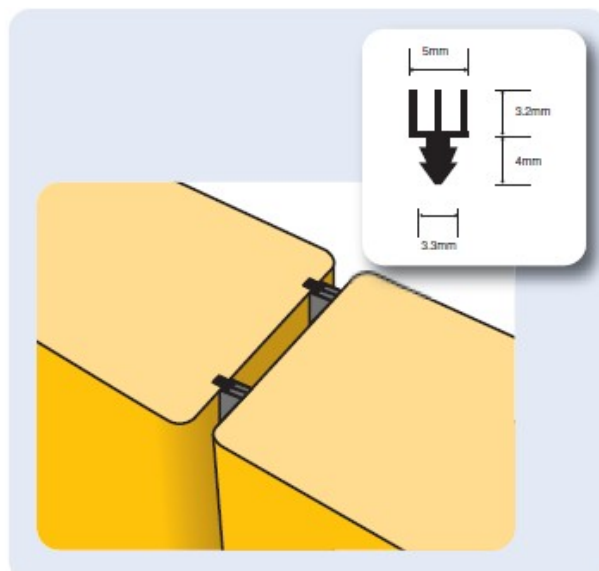

Trident

These seals were designed as an upgrade to pre-assembled fire resistant doors, this perimeter seal can be fitted in a single or double row to provide acoustic and additional protection against cold smoke. Fir tree friction fitment into a 3mm wide saw cut. It consists of a semi-rigid base with 3 flexible blades, these flexible blades act like a triple glazing giving maximum acoustic performance along with smoke seal capabilities.

Halspan Acoustic and Smoke Seals are available in black, white and brown.

Key Benefits

- Air trapping technology to increase acoustic performance.
- Ultra soft smooth blades to minimise open/closing forces (UK Building Reg Doc M).
- Excellent recovery values to increase service life.
- Smoke seal capabilities.
- Not effected by ironmongery.

Halspan Fire Seals are available in a range of colours:

White

Brown

Black
